# 1. Introduction of QMGF

We Wealthy(\$QMGF) is endorsed by overseas funds, and jointly created by the Mystery capital, Chinese Alliance, PI Friends, and the Chinese Dream Team.

QMGF has learned a few tricks and successful experiences from successful meme tokens. This new crypto token was born as a joint community meme symbol by fans of the cryptocurrency. It was deployed by experienced crypto individuals on 13th June 2023.

The aim of QMGF is to create a new opportunity for those who missed them before to build a strong philanthropic community and achieve common wealth to all community members.

Total supply is 250,000 and starting price is \$1 after launch. All QMGF tokens and 20,000 USDT had been added to the liquidity pool. Hence, everyone can only buy QMGF from Liquidity.

The rest USDT from public sale will be all used for buyback and burn.

QMGF believes: Idle funds, value investment, maximize returns and fulfill common wealth.

## 2. Background

Wewealthy(QMGF) is establishing the new standard of DeFi Tokenomics with its innovative and game-changing Smart Contracts. Smart contracts are simply programs stored on a blockchain that run when predetermined conditions are met without any intermediary's involvement or time loss. Based on the Binance Smart Chain(BSC) Blockchain, Every Buy/Sell transaction in QMGF is taxed and used to fund the USDT passive income and advanced mechanisms like automatic buyback and burn QMGF tokens.

QMGF automatically rewards its NFT holders and LP holders; at the same time, QMGF automatically buyback and burn, which is unprecedented in cryptocurrency history.

QMGF helps to reduce the risks involved with cryptocurrency market volatility. Over time, holders can earn enough USDT rewards to cover their initial investment, turning their investment into a cost-free asset.

QMGF is a token for the crypto investor who wants to be rewarded for their long-term investing. Establishing an innovative concept where investors no longer need to worry about their investment doubling to make profits; instead, they can earn a passive income from Usdt rewards while watching their portfolio grow.

## Community

QMGF has a united, friendly and enthusiastic community, and we are completely transparent and open to all members.

We believe in the strength of the DAO community. We've got lots talented people who can work together, who can offer the project huge potentials, who can push QMGF to the moon eventually.

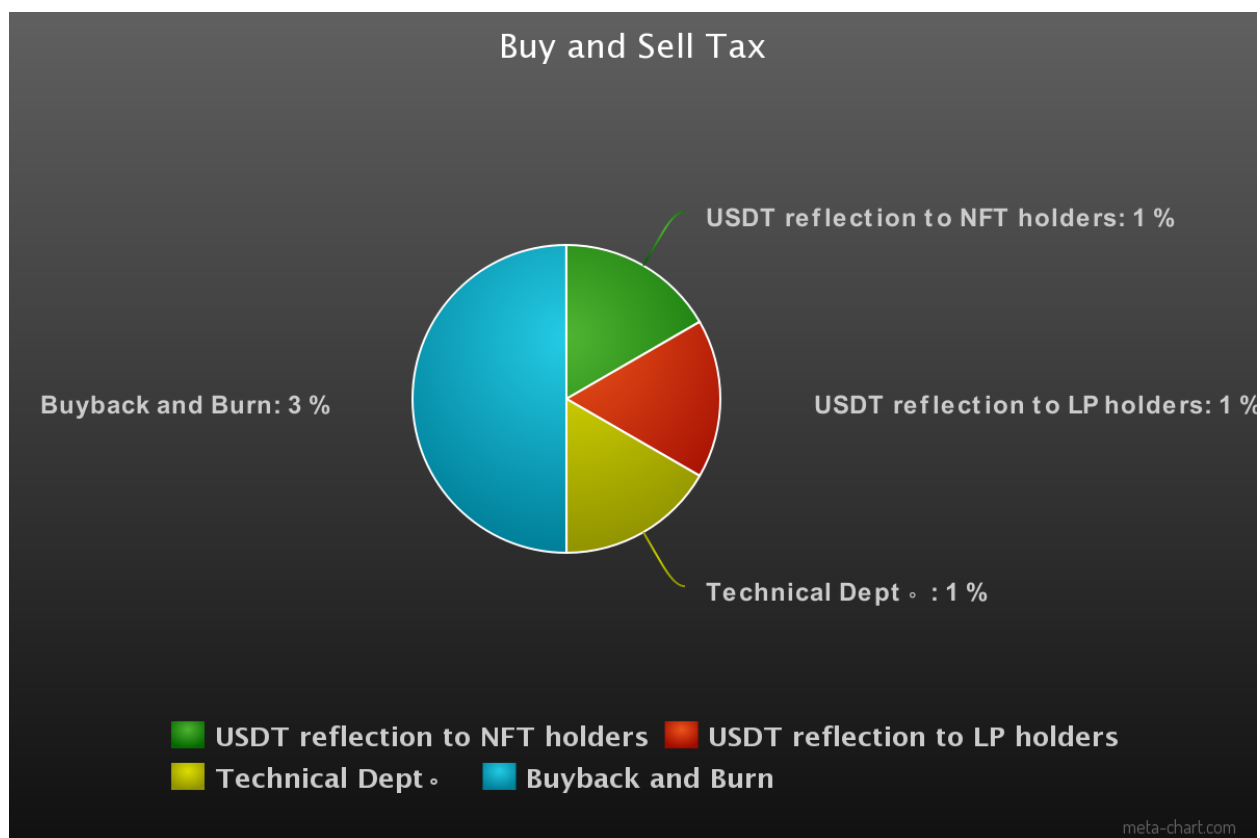

### 3. Economic Model

The QMGF Ecosystem focuses on extreme mechanism buyback and burn, and NFT marketing. QMGF is a pure simple transparent model like Pepe, which will attract more investors around the world.

QMGF does not only grow value in your wallet, but also has lots of bonuses like passive USDT income! QMGF is a top crypto currency, integrating burning, NFT and Charity marketing. QMGF will bring more and more value to all holders.

### Tokenomics

- Token Name: QMGF
- Total Supply: 250,000

## Security

The QMGF token will be subject to a smart contract security audit (Cerkit Audit) in the future and its smart contract has been opensource and renounced. Apart from that, QMGF LP(liquidity pool) has been locked for 100 years, which means that QMGF will never have its liquidity pulled, distribution manipulated, or have any malicious person be able to harm the project.

And as mentioned before, the dev team of this QMGF didn't hold any tokens, and no tokens left for ecological development. Yes, no dev is going to dump you, because he doesn't have any tokens and ownership is renounced.

You can safely invest in QMGF, protect your pocket money, and it will pay off in unexpected ways over the long term.

## 4. Future Plan

### Our roadmap

#### PHASE 1.

- Core Development
- Marketing (ads/influencers)
- Project build
- Website building
- Whitepaper V1
- Contract deployment
- 1000 Holders

#### PHASE 2.

- CoinMarketCap Listing
- CoinGecko Listing
- Post-launch marketing
- Campaign
- Certik Audit
- 5000 Holders
- \$10M Marketcap
- Listing NFT in NFT marketing platform

#### PHASE 3.

- Listing on CEX
- Explosive marketing
- NFT sales activities
- QMGF charity program
- Listed on the world's top ten exchanges
- More features launched
